Eval. Notes:	A joint NJDEP and EPA Subpart BB inspection was conducted at RB Manufacturing on 7/16/2019. The facility representative present at the time of this inspection was Ms. Ibis Picart, EH&S Manager. Also present during this inspection were Mr. Dean Koncsol and Ms. Suzanne Customs from Baron Environmental Associates. This inspection was initiated due to the hazardous waste and tank inspection which originally took place on 1/17/2019 (See NJEMS Pl#: NJD068709153-SCI190001 for inspection report). See attached word document for specific information regarding this Subpart BB inspection.												

No Linked Violations

Note: Penalty information associated with an enforcement action is reported with the enforcement action. For enforcement actions associated with multiple violations, the penalty information will be reported with each violation, however, the penalty is only assessed once, regardless of the number of violations associated with the enforcement.

<b>CEI Evaluation</b>	06/24/2014	Activity Location:	NJ	By:	STATE	Identifier:	001	Person:	NOSDS	Suborganization:	Found Violation:	NO
NOC Date:		Citizen Complaint:	NO	Multimedia Inspection:	YES	Sampling:	NO	Not Subtitle C:	NO	Day Zero:	06/24/2014	Focus Area:
Eval. Notes:	On 6/24/14, the Department conducted a routine RCRA inspection at Reckitt Benckiser (Reckitt) (NJD068709153), located in Hillsborough, NJ. The facility representative was Mrs. Ibis Picart, Environmental, Health & Safety Manager. Reckitt was last inspected on 9/20/12, by Mrs. Paula Hanley-Tagliaferri (NJDEP). Reckitt was assessed at a large quantity generator (LQG) of hazardous waste. Reckitt is a manufacturer of consumer cleaning products, and air fresheners (Airwick, Lysol toilet bowl cleaner, Easy Off oven cleaner, resolve, Rid Ex, Mop & Glo, etc...). Manufacturing is performed in a batch process, and continuous blending process. Raw materials, used in manufacturing, include various flammables (denatured alcohol, fragrances, and liquefied petroleum for propellants), and corrosives (hydrochloric acid, bleach, and caustic). Glycol ether, and surfactants are also added into the process. The largest waste stream is generated from the wash outs of the fill lines in the packaging area, with denatured alcohol. Other hazardous waste streams are waste methanol is generated from the HPLC machines found in Reckitt's QA/QC laboratory; waste chloroform from titration tests, off-specification materials, obsolete raw materials, spill clean-up materials; waste inks; and off-spec aerosol cans of finished product. The inks are used in the packaging lines, from printing codes on the containers of product. Some used oil is also generated from maintenance of compressors, and other associated manufacturing equipment. A review of racket's LQG documentation requirements - contingency plan, training, preparedness & prevention was performed. No problems were identified during the documentation review. No Notice of Violations (NOV's) were issued. In addition, Reckitt's hazardous waste manifests (dated 9/20/12 through 6/20/14) were reviewed. These manifests were found to have been properly completed, and in compliance. No problems											

### No Linked Violations

<b>CEI Evaluation</b>	09/20/2012	Activity Location:	NJ	By:	STATE	Identifier:	001	Person:	TOPHT	Suborganization:	Found Violation:	NO
NOC Date:		Citizen Complaint:	NO	Multimedia Inspection:	NO	Sampling:	NO	Not Subtitle C:	NO	Day Zero:	09/20/2012	Focus Area:
Eval. Notes:	I conducted a LQG inspection at Reckitt Benckiser (Reckitt). This site was last inspected by this program on 2/8/10 with no violations found. Reckitt is a manufacturer of consumer cleaning products and air fresheners such as Airwick, Lysol toilet bowl cleaner, Easy Off oven cleaner, Resolve, Rid Ex, Mop & Glo and Lime Away. Manufacturing is done through a batch process and continuous blending process. Raw materials used in manufacturing include various flammable and corrosive materials such as hydrochloric acid, bleach, caustic, denatured alcohol, glycol ether, surfactants, fragrances and liquefied petroleum for propellants. Hazardous waste generated on site is from the wash outs of the fill lines in the packaging area with denatured alcohol, off spec materials, obsolete raw materials, waste methanol from the HPLC machines and chloroform from titration test in the QA lab, spill clean up, waste inks and off spec aerosol cans of finished product. Inks are used in the packaging machines from printing codes on containers. Used oil is also generated on site from truck maintenance and compressors. Lastly, Reckitt has a wastewater treatment system (WWT) on site for wastewater generated during manufacturing. The wastewater is pH adjusted and then discharged to the sewer under Somerset Raritan Valley Sewerage Authority discharge permit #23E. During a walkthrough of the site, the lab was found storing a 5-gallon satellite accumulation container (SAC) of chloroform and a 5-gallon SAC of HPLC waste methanol which were both properly marked. No SAC's of hazardous waste were found stored in the manufacturing areas and packaging areas at the time of this inspection. The 90-day hazardous waste storage areas are located in the aerosol manufacturing area and flammable storage area. One box of various expired materials was found stored in the flammable storage area. The box contained small containers (1-gallon											

### No Linked Violations
